Health Supplements and Nutraceuticals Compliance Guidance							
08. Quantity of nutrients FSS (HSE) 2016 (b)(3)(iii)(2) and (7)(b)(iii)(2)							
<table><tr><th colspan="2">Applicable to</th></tr><tr><th>Health Supplements</th><th>Nutraceuticals</th></tr><tr><td></td><td></td></tr></table>	Applicable to		Health Supplements	Nutraceuticals			
Applicable to							
Health Supplements	Nutraceuticals						
Where applicable the amount of nutrients must be expressed as a percentage of the relevant recommended daily allowances (RDA) as specified by the Indian Council of Medical Research (ICMR) and where these are not specified by ICMR, the RDA provided by Codex Alimentarius apply.							
This requirement is typically to be provided on the Nutrition Information panel which is a specific requirement for Health Supplements and Nutraceuticals, FSS (HSE) 2016 (b)(3)(iii)(2) and (7)(b)(iii)(2).							
Global Practice (Note Global Practice the requirement of declaration of percentage of RDA for the nutrient is supported by the definition of Nutrient): <ul style="list-style-type: none">• Codex Guidelines on nutrient labeling, CXC/OLE/12/1992<ul style="list-style-type: none">• Nutrient means any substance normally consumed as a constituent of food<ul style="list-style-type: none">• which provides energy or which is needed for growth, development and maintenance of life, or of which all cases characteristic has chemical or physiological changes to occur
